## MAKE SURE THE NEXT ROOM IS A WORLD AWAY

Do you:

Have noisy neighbours keeping you up until early hours of the morning?

Worry that the sound of the television in your living room will affect the concentration of your child studying in the next room?

Tip toe across the second storey of your home fearing you may wake the person sleeping in the bedroom below?

If you answered yes to one or more of these questions, then it's time you had Pink® Soundbreak™ installed in the walls, ceilings and sub-floors of your home. Pink® Soundbreak™ will undoubtedly limit the level of sound transfer in your home, enabling you to ditch nuisance noise and opt in to love the sound of silence.

Not only will Pink® Soundbreak™ provide you with peace of mind, but it will also deliver exceptional thermal performance that will improve the energy efficiency of your home allowing you to reap the rewards of energy savings all year round.

Whilst nothing is impossible, it is strongly recommended that Pink® Soundbreak™ is installed during the construction stage of your home as it's often too late to change your mind once the plasterboard is fixed.

**IDEAL FOR EXTERNAL WALLS, INTERNAL WALLS, CEILINGS AND BETWEEN FLOORS**

**REDUCES ROOM TO ROOM NOISE TRANSFER**

**KEEPS YOU WARMER IN WINTER AND COOLER IN SUMMER**

**REDUCES ENERGY USAGE SAVING YOU MONEY**
